

# EL DORADO

## Birding Tour

TRUMAN

NATURE EXPERIENCE

# EL DORADO

Tour inspired in the Muisca legend "El Dorado", where the Spanish conquerors believed in a city built and covered in gold. The real wealth of this territory is its biodiversity.

El Dorado route has more than 600 bird species, living in the East cordillera, for example, Green bearded helmetcrest, most of this species lives in the highland Andes. At least 12 species are endemic. Our endemic-laden extension takes us to Cundinamarca department.

# Days of birding

**TRUMAN**  
NATURE EXPERIENCE
