

## SUSTAINABILITY POLICY

*Truman Journeys*, a travel agency specializing in nature and adventure tourism, bases its mission on Colombia's environmental and cultural richness, promoting its recognition and conservation both nationally and internationally. We recognize the importance of maintaining sustainable tourism development in the regions where we operate, relying on the implementation of Sectoral Technical Standard NTS-TS 003 to guarantee quality and accountability in our services to clients, suppliers, and partners.

Recognizing that our tourism operations have a direct impact on the environment, it is our responsibility to manage our activities sustainably by making commitments aimed at preventing, eliminating, or reducing the impact of our operations on the destinations included in our portfolio of services, as well as optimizing the Agency's sustainability by continuously improving our environmental performance.

In this regard, our company has adopted a sustainable tourism policy, through which it commits to complying with the requirements established in Standard NTS-TS 003, which includes, among other things, the legal requirements governing the impacts generated by tourism activities. Likewise, we are committed to motivating and training our employees and suppliers through educational and awareness-raising initiatives on the principles of sustainable tourism; we also aim to promote good environmental practices in our surroundings and participate in external activities that foster positive environmental actions through the efficient use of resources.

One of our main objectives is to improve our sustainable management practices by committing to continuous improvement in all areas of sustainability, environmental, sociocultural, and economic, as well as in customer, supplier, and partner satisfaction.

This sustainable tourism policy will be updated whenever circumstances require it, and in such cases, new sustainability goals will be adopted and published.
